## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I-VIII, claims 1, drawn to a protein comprising an amino acid sequence of SEQ ID NOS: 1-8, respectively.

Group IX-XVI, claims 2-6, drawn to an isolated nucleic acid comprising an nucleic acid sequence of SEQ ID NOS: 9-16, respectively.

Group XVII-XXIV, claim 7, drawn to an antibody that binds to a protein comprising an amino acid sequence of SEQ ID NOS: 1-8, respectively.

2. The inventions listed as Groups I-XXIV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-XXIV appears to be the polypeptides of SEQ ID NOS: 1-8. However, WO9846757-A2 (Publication date: 10/22, 1998) teaches an isolated polypeptide, which is 100% identical to the amino acid sequence of SEQ ID NO: 2 (see attached sequence alignment).

Therefore, the technical feature linking the inventions of Groups I-XXIV does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

3. The special technical features in Groups I-VIII are an isolated peptide comprising an amino acid sequence of SEQ ID NOS: 1-8, respectively, the special technical features in Groups IX-XVI are an isolated nucleic acid comprising a nucleic acid sequence of SEQ ID NOS: 9-16, respectively; whereas the special technical features in Groups Group XVII-XXIV are an antibody that binds to a protein comprising an amino acid sequence of SEQ ID NOS: 1-8, respectively.
4. Accordingly, Groups I-XXIV are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept. Thus, unity of invention is lacking and restriction is appropriate.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (l).
